PURFLUX GROUP, has the goal of remain a sustainable automotive and the last key supplier standing and to be recognized as a key player by his customers around Filtration fields.

In an automotive environment in evolution, our strategy aims at ensuring development and sustainability of our company.

In link with our Strategy, our main objectives from 2024 till 2026 are:

- **Stay profitable and increase productivity,** by continuously improving our organization and performances, taking into account environmental issues and early identification of risks and opportunities in the market.
- **Develop and propose innovative products, profitable for interested parties and communities.**
- **Satisfy customers and interested parts expectations by identifying and being compliant with their requirements (CSRs) as well as legal and regulatory requirements.**
- **Ensure safe and environmentally friendly work conditions for all interested parties.**
- **Develop fruitful synergies with our suppliers and external providers.**
- **Promote a sustainable and result-oriented culture among employees.**

Each of our processes through our Quality System Management contribute to reach the targets.

In order to satisfy our customers and to drive change, we count, on the active involvement of all process pilots and their collaborators.

Guyancourt, 24th February, 2026

Julien GRANGE
